

Hello Andrea Maiani,

Welcome to this month's My TE Advantage Newsletter. Thank you for choosing Tyco Electronics to supply you with this source of news, product releases, updates and technical information about each industry's products and applications.

Alternative Energy

New High Voltage & EMC Shielding Inline Connector for Alternative Powered Systems (APS)

Tyco Electronics has developed a 2-position HVA 400 plug and cap inline connector system that is designed specifically for handling high voltage and EMC shielding applications for alternative powered systems (APS).

VAL-U-LOK Connectors With Color-Coded Housings

Tyco Electronics has expanded its popular VAL-U-LOK connector family with a choice of red, black, or blue housings in addition to the standard white already offered. Color coding helps make identification of different circuits during assembly and maintenance simpler and clearer.

All Industry News

Tyco Electronics Wireless Systems And Lakewood, Colorado Police Department Provides Radio Communication Support For The 2008 Democratic National Convention

Collaborative effort equips Denver metro area public safety first responders with the interoperable equipment and service needed to coordinate and expand the 08 DNC security effort. [More](#)

Ozaukee County, Wisconsin Expands 4.9 GHz Broadband Public Safety Network to Enhance Security and Surveillance Efforts

Tyco Electronics Wireless Systems' VIDA broadband network solution provides the county's public safety agencies with enhanced video monitoring of major county facilities [More](#)

Tyco Electronics Wireless System's Florida Statewide Law Enforcement Radio System (SLERKS) Facilitates Public Safety Communication And

Industrial & Commercial

Hot-Pluggable Connectors For Lighting Ballasts

A new connector for fluorescent ballast lighting applications provides a hot-pluggable disconnect to allow safe field servicing without exposing personnel to electrical shock hazards. Available in 2- or 3-position preassembled mated connector sets or with factory installed flying leads, the connector accepts 18 AWG solid wire.

Lighting

Introducing a Thru-Hole Version of the Popular SMT Poke-In Connector for the LED Lighting Market

The new thru-hole version joins the existing surface-mount connector to provide a low-profile solution suited for use in PCB-based LED strings, lighting controls and other nonlighting applications that can benefit from an easy poke-in wire termination to the PCB.

[More](#)

New Connector for Lighting Strips

The hermaphroditic blade and receptacle connector is a new SMT connector intended for use with in-line board-to-board applications. The hermaphroditic blade and receptacle connectors are available in 2, 4 and 6 position configurations.
