Address :NO.8,Gao Long Dong Road,Gao Bu Town,Dong Guan City,Guang Dong Province China

---

To:BRT Customer:

Registration,Evaluation,Authorization and Restriction of Chemicals(REACH) is a new European Union Regulation,EC/2006/1907 of 18 December 2006,REACH is fully enforced,It requires all companies whether manufacturing or importing chemical substance into the European Union to register these substances with the European Chemicals Agency, if companies manufacture or import in quantities of one ton or more per year and if there substance are released(in their normal function) could be considered as dangerous to Human Health or to the Environment.

Potential registrants(i.e manufacturers and importers of chemical substance) must 'pre-register' these substances by December 1,2008,in order to benefit from postponed 'phase in' deadlines. Supply of substance to the European Market which have not been registered as required is illegal(known in REACH as 'no data,no market').

REACH also address the continued use of chemical 'Substances of Very High Concern'(SVHC) because of their potential negative impacts on Human Health or the Environment. The European Chemicals Agency may need to be notified of the presence of SVHCs in articles, if they are present above certain tonnage and concentration thresholds. Depending on the substance in question and its use, producers and importers may then be obliged to investigate its effects on human health and the Environment.

BRTLED have reviewed and is guaranteeing that all of our material do not contain 16 candidates of SVHC. Our LED lamps and displays do not release any substance at their normal function which could affect the Human Health or the Environment. Therefore,there is no need to pre-register to European Chemicals Agency and that BRTLED can be distributed freely to European.

Company: BRIGHT LED ELECTRONICS CORP.
